Duplicate Detection Engine	24
Candidate History Timeline	18
Rejection Management	14
Blacklist Management	14
Offer & No-Join Tracking	15
Email Automation	26
Internal Notifications	14
Dashboard	15
Recruitment Funnel Analytics	13
Reports & Export (PDF/Excel/CSV)	5
Search & Advanced Filters	13
User Roles & Permissions	13
Audit Logs & Activity Tracking	2
TOTAL	260 Hours

Proposal Summary

Estimated Effort: 260 Hours

Expected End Product / Deliverables

At the completion of the project, HexaLearn will receive a centralized **Candidate Management System (CMS)** with the following:

- **Candidate Management Module** – Complete candidate registration, profile management, resume storage, and candidate records.
- **Candidate Lifecycle Management** – Track candidates from application through interview, selection, offer, joining, rejection, or blacklist.
- **Duplicate Detection** – Identify existing candidates using name, mobile number, and email.
- **Candidate History** – Complete application, interview, offer, joining, rejection, and blacklist history.
- **Rejection & Blacklist Management** – Predefined reasons, alerts, history, and approval controls.
- **Email Automation** – Automated candidate communication for interviews, selection, offers, joining, and rejection.
- **Offer & No-Join Tracking** – Track offer status, acceptance, joining, declined offers, and no-join candidates.
- **Recruitment Dashboard** – Real-time overview of candidate and recruitment status.
- **Reports & Analytics** – Candidate, recruiter, hiring, rejection, no-join, and blacklist reports.
- **Report Export** – Export reports in PDF, Excel, and CSV formats.
- **Advanced Search & Filters** – Quickly find candidates using multiple criteria.
- **Role-Based Access Control** – Admin, HR Manager, Recruiter, and Hiring Manager access.
- **Audit Logs** – Track important user and candidate activities.
- **Responsive Web Interface** – Accessible through modern desktop and supported mobile/tablet browsers.
- **Production Deployment** – Final system deployment and configuration for use by authorized users.

Final Outcome: A centralized, web-based Candidate Management System that replaces spreadsheet-based candidate tracking and provides a structured recruitment workflow, centralized candidate history, reporting, search and filtering, and role-based access.
